MICHELIN ENERGY GUARD	
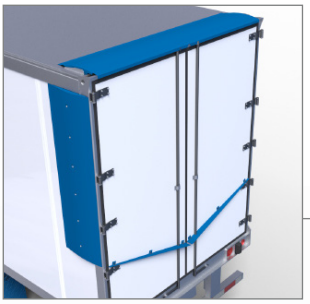
Fuel Savings	
10 gallons per 1000 miles[1]	MVT Solutions Certified™ fuel savings of 8.75%[1]

TRAILER END SOLUTION

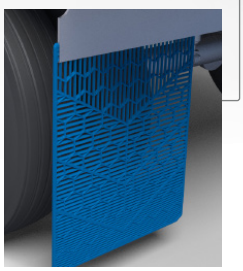
Patent-pending top and side trailer design to accelerate and then turn airflow around the back of the trailer.

Patent-pending, rear-facing spoiler for swing and roll-up doors. Reduces the size and effect of the primary recirculation zone behind the trailer.



RESILIENT TRAILER SKIRT

Advanced trailer skirt designed to integrate with other components. New technology enables more coverage and stiffness without sacrificing durability or ability to deform over obstacles.



ENERGY FLAPS

Patented individual louvers helps to increase safety by dispersing spray downward, away from vehicles and out of the drivers side-view, while greatly reducing vehicle drag.

SCAN TO LEARN MORE

1 Estimated fuel savings at 65mph based on commissioned, third-party (Mesilla Valley Transportation Solutions) MVT Solutions Certified™ testing procedure on a modern Class-8 truck with a 53' van trailer compared to a trailer with no aerodynamic devices. Actual results may vary.
