POWERCOIL™

A new generation of more robust steel casing cables that makes them lighter with a better endurance.

INFINICOIL™

A continuous steel wire – which can be as long as 400 meters – wrapped around the tyre to provide it with greater stability throughout its lifetime. On top of benchmark endurance, tyres designed with INFINICOIL™ get you more mileage.

CARBION™

A material resulting from an innovative mixing process in which certain tread components are mixed when liquid creating a more uniform, material. This material increases mileage performance of the tyre and improves its rolling resistance to allow fuel savings.

REGENION™

Self-regenerating tread blocks, supported by our mold 3D metal printing techniques, providing solid grip throughout tyre's lifetime and conditions.

Michelin products are manufactured from high quality materials to high tolerances, ensuring a uniform and consistent performance. Correct application, fitting, inflation and regular inspection of the product are essential to its safe and efficient operation. Remix and the tyre designations mentioned are trademarks of Michelin. For further information about any of the products in this document, contact your local Michelin representative or Technical Liaison helpline on 0845 366 1535.
