

MICHELIN® X® TWEEL® SSL

AIRLESS RADIAL TIRE

DESIGNED FOR USE ON SKID STEER LOADERS

The All Terrain model is ideal for use on a wide range of surfaces while the Hard Surface and Hard Surface Traction models help provide maximum tread life on pavement.

No Maintenance No Compromise No Downtime

MICHELIN® X® TWEEL® SSL

No Maintenance – MICHELIN® X® TWEEL® SSL is one single unit, replacing the current tire/wheel/valve assembly. There is no need for complex wheel/ tire mounting equipment. Once they are bolted on, there is no air pressure to maintain.

No Compromise – Productivity can be increased because the MICHELIN X TWEEL SSL provides greater stability and enables a skid steer to work faster with more comfort for the operator, reducing driver fatigue while improving productivity. The MICHELIN X TWEEL SSL delivers a consistent footprint with strong wear life that is two to three times that of the pneumatic tire at equal tread depth. Additionally, the unique energy transfer within the poly-resin spokes reduces the “bounce” associated with pneumatic tires.

No Downtime – MICHELIN X TWEEL SSL performs like a pneumatic tire, but without the risk and costly downtime associated with penetrations and impact damage.
