

## Stacking of MICHELIN® X One® Tires

The purpose of this Technical Bulletin is to provide some guidelines on the stacking of Michelin's X One tires. Stacking MICHELIN® X One® tires too high could result in safety issue and / or could possible damage the bottom tires.

New MICHELIN® X One® tires should never be stacked higher than 3 meters (approximatley 10 ft.). This will allow the stacking of up to 6 new tires depending on the dimension.

For used and / or damaged MICHELIN® X ONE® tires stacking them more than 5 high may pose a safety concern.

For additional information, please contact your local Michelin sales representative or contact Michelin using the website at US : [business.michelinman.com](http://business.michelinman.com) or CA : [business.michelin.ca](http://business.michelin.ca).
