(1) REGENION

Self-regenerating tread blocks, supported by our mold 3D metal printing techniques, providing solid grip throughout tyre's lifetime and conditions.

Michelin won the European Inventor Award 2018 in the industry category with REGENION technology.

(2) INFINICOIL

A continuous steel wire – which can be as long as 400 meters – wrapped around the tyre to provide it with greater stability throughout its lifetime. On top of benchmark endurance, tyres designed with INFINICOIL get you more mileage or enhanced fuel savings.
