

REGIONAL & URBAN APPLICATIONS

THE MICHELIN® XZE 2™ TIRE

Exceptional regional, all-position radial with extra-wide, extra-deep tread designed to help deliver our best wear in high scrub regional and urban applications.

Exceptional regional, all-position radial with extra-wide, extra-deep tread designed to help deliver our best wear in high scrub regional and urban applications.

Matrix Siping technology helps prevent irregular wear and increase traction. The 3D Matrix Sipes lock together for the stability normally associated with solid tread blocks.

Enhanced application specific compounds to promote resistance to aggressions and longer tread life.

Rib edge micro sipes helps protect against irregular wear.

Zig-zag grooves help increase traction in new and worn tire conditions.

Groove bottom protectors protects against stone drilling.

Full-width, elastic protector ply helps protect the working plies from bruising and penetrations.

Rectangular bead bundle – a Michelin exclusive – simulates a solid steel rod “strapping” the tire onto the wheel. This design stabilizes the entire bead region and minimizes fatigue in order to extend casing life.

Extra strong curb guards help protect sidewalls against most impacts and abrasions for long casing life.

Tread design may vary depending on tire size.

| Size | Load Range | Catalog Number | Tread Depth 32nds | Max. Speed (*) | | Loaded Radius | | Overall Diameter | | Overall Width (‡) | Approved Wheels (Measuring wheel listed first.) | Min. Note: Wheel listed first is the measuring wheel.

(*) Exceeding the lawful speed limit is neither recommended nor endorsed.

(‡) Overall widths will change 0.1 inch (2.5 mm) for each 1/4 inch change in wheel width. Minimum dual spacing should be adjusted accordingly.

MICHELIN® tires and tubes are subject to a continuous development program. Michelin North America, Inc. reserves the right to change product specifications at any time without notice or obligations. Please consult wheel manufacturer's load and inflation limits. Never exceed wheel manufacturer's limits without permission of component manufacturer.
