

TRUCK PLUS

Advanced cost control solution and performance services designed to run cost effective operations and master fleet management.

MICHELIN
CONNECTED FLEET
Powered by MASTERNAUT

FLEET MANAGEMENT. MASTERED.

TRUCK PLUS

Our fleet management solution, TRUCK PLUS, combines three and inseparable key elements: Connected vehicle technology, day-to-day fleet management, and customer support and performance analysis.

FLEET MANAGEMENT PLATFORM

Real-time monitoring and job planning for smarter daily decision making.

MONTHLY SMART REPORT SERVICE WITH ACTION PLANS

Data analysis reviewed monthly and transformed into action plans to improve operational performance.

DRIVER MANAGEMENT TOOLS & TRAINING

In-cab tools to encourage better driving behaviour, alongside driver training support.

IMPROVED PERFORMANCE ON KEY BUSINESS NEEDS

Improving in areas where it matters the most for you: **Cost control, safety, productivity and run more sustainable fleets.**

DATA CAPTURE AND TECHNOLOGY

DETAILED FEATURES

Driving Behaviour

COST CONTROL - SAFETY

Reduce your fuel consumption and therefore your costs, and increase safety by improving the performance of your drivers with live alerts and proactive action plans.

Data for driver training

- Support efficient training of drivers by using real life, real time data to show improvement opportunities

Driver ID

- Always know who is driving which vehicle

Alerts and reports - driver and platform

- Be aware of driving behaviours and patterns, including idling, speeding, inertia, harsh braking, RPM, harsh turns, and use the data to help control fuel costs

Tacho infringements

- Manage and monitor tacho infringements easily

Live Monitoring

PRODUCTIVITY

Benefit from full visibility on current operations and the location of your of your vehicles in real time.

Vehicle location

- React quickly to issues with real-time fleet visibility

Journey information

- Set and receive alerts when the driver deviates from a set route

Asset management

- Know where your fleet is and choose the best vehicle for any job based on proximity

Geofencing

- Manage time on sites by creating bespoke geographic boundaries for common places of interest

Live alerts

- Stay on top of driver behaviour or incident alerts

Job Management

PRODUCTIVITY

Maximise the efficiency of your fleet and operations through better planning optimised driver and asset management and real-time event response.

Tacho Live

- Select the right driver for the job. Balance the workload across your team of drivers and reduce the risk of tacho time infringements

Tacho hours (Live)

- Easily assign jobs to drivers with driving time

Tacho download

- Get access to full tacho information without relying on the driver coming back to base

PERFORMANCE ANALYSIS & CUSTOMER SERVICES

At MICHELIN connected fleet our differentiator lies in the way we accompany our customers. Regular contact by our field teams, performance analysis services, accessible customer service and a personalised and responsive after-sales service, are the keys to our solutions.

ZOOM ON OUR SMART REPORT SERVICES

Data analysis transformed into action plans to improve operational performance.

MEASURE AND IMPROVE

- KPI setting: Fuel consumption, harsh driving, speeding, idling, utilisation, co2 emission
