## HOW TO RESPOND TO YOUR CUSTOMERS' QUESTIONS

- Q:** What is the difference between the Michelin Agilis CrossClimate C-Metric sizes vs. the LT sizes?
- A:** The C-metric convention can be thought of as the European equivalent of the LT-metric. Just as LT-metric describes a tire with a higher load rating and higher pressure than the equivalently sized P-metric tire, C-metric describes a tire with a higher load rating and higher pressure than the equivalently sized European Metric tire.
- Q:** What are the main differences between the Michelin Agilis CrossClimate tire and the Michelin Defender LTX M/S tire? When should the Michelin Agilis CrossClimate tire be recommended vs. the Michelin Defender LTX M/S tire?
- A:** The Michelin Agilis CrossClimate tire is optimized for commercial usage—which means usage by businesses carrying heavy loads, high-duty cycles, frequent towing, and constant or near-constant driving. The Michelin Defender LTX M/S tire is optimized for personal usage, including daily commuting, running errands, occasional trips to the home improvement store, tailgating and camping. Varying usage calls for different recommendations.
- Q:** How does the Michelin Agilis CrossClimate tire perform vs. the Michelin Defender LTX M/S tire?
- A:** Compared to the Michelin Defender LTX M/S tire, the Michelin Agilis CrossClimate tire has slightly better snow traction (including the 3PMSF certification on all LT-sizes), better rolling resistance and better tread life under heavy loads. The Michelin Defender LTX M/S tire has better tread life under light loads. The two tires are similar for other performances.
- Q:** Why is the Michelin Agilis CrossClimate tire offered in two different tread designs?
- A:** The Michelin Agilis CrossClimate C-Metric tire was designed in Europe specifically for the European style vans that are also offered in the North American market. The C-Metric is a directional tread pattern. The LT sizes are non-directional and were designed by the North American Research and Development team to best suit ¾- and 1-ton pickups and vans. Both treads offer comparable performance.
- Q:** Is the Michelin Agilis CrossClimate tire backed by a mileage guarantee and, if not, does the Michelin Promise Plan apply (30-day ride, 3-year flat tire assist)?
- A:** Tires sold for commercial usage are not backed by a mileage guarantee; however, Michelin will offer a 30-day satisfaction guarantee from date of purchase.
