

#	Criteria	Max Points	Description
1	Innovation Index	10	Rating on the concept or idea proposed. Its relevance to the topics proposed. Level of thought process put into it. Out of the box thoughts will fetch more points. Don't take the level of implementation of those ideas in this criterion. If the innovation has some level of plagiarism/ derived concept to your knowledge reduce the points accordingly.
2	Quantum of work done on the concept	10	How much work is put into the idea. In terms of testing, simulation, product development etc. Grade ONLY the EFFORTS made to make the idea more real and executable.
3	Involvement of external agencies for the concept	5	How an effective/relevant Cross Functional Team is used for developing the concept or in the efforts being made. This should be more external agencies like ARAI or other testing facilities, or at least some departments inside the college.
4	Practicality of the concept	10	In your view, how far is the idea from implementation in real life. Is it more concept balise or market. More closer to implementation fetches more points.
5	Presentation	5	Includes presentation skills, content, ppt, organizing and public speaking.
6	Answers to Questions raised	10	Rate how the team is answering to the questions raised. Apart from the validity of the answers, also rate their confidence and conduct in taking questions. Participation as team in answering will fetch more points than 1 particular individual answering.
