LE MANS

THE CIRCUIT

FEATURES

The Circuit des 24 Heures – aka Circuit de la Sarthe – is the longest and fastest venue visited by the 2018/2019 FIA WEC. The average speed of a qualifying lap is more than 250kph. The track's long straights make huge demands on the tyres' casings, even though the infamous Mulsanne Straight was split into three sections by two chicanes some 20 years ago. Grip levels vary depending on the surface type (busy trunk roads, Le Mans-Bugatti circuit) but tyre wear is relatively low.

(LOCAL TIME)

JÉRÔME MONDAIN

Endurance Racing Programme Manager,
Michelin Motorsport

“LE MANS IS AN EXCEPTIONALLY LONG, FAST CIRCUIT, SO IT POSES A UNIQUE CHALLENGE AS FAR AS TYRES ARE CONCERNED BECAUSE OF THE HIGH TOP AND AVERAGE SPEEDS THE CARS REACH, AS WELL AS THE DEMANDS IT PLACES ON TYRES. On top of that, it isn't a permanent facility, so we can only test at Le Mans when official practice sessions are organised. This year is probably our first time here with the same range we had for the previous year's race. That's because the calendar of the FIA WEC's 2018/2019 Super Season includes two visits to Le Mans and, in keeping with the regulations, we must race with the same choice we had in 2018. The benefit of that is that we now have good experience of the tyres our 53 partners will use. At the same time, though, we obviously have no control over the conditions or weather, so we will need to adapt.”

RECORDS TO BEAT AT LE MANS

20 The distance (metres) that **separated** the two Ford GT40s at the finish in 1966

349.80KM The **biggest ever gap** between the winner and second place (in 1927)

405KPH The **highest speed** ever registered at Le Mans (1988, WM-Peugeot)

33 The number of **Porsche entries** (out of a total entry of 49 cars) for the 1971 race

9 The number of **wins** scored by Tom Kristensen at Le Mans

33 The number of Le Mans starts by **Henri Pescarolo**

19 The number of **Porsche wins** at Le Mans

21 The number of consecutive **wins by the same tyre** manufacturer (Michelin) at Le Mans

#LeMans24 #PerformanceMadeToLast #MichelinLeMans24

THE 2019 LE MANS 24 HOURS

LM P1

LE MANS PROTOTYPE 1

LM P1 TYRES

Michelin has developed tyres for the Toyota hybrid prototypes as well as for its other LM P1 partners whose cars are powered solely by an internal combustion engine. In compliance with the regulations, the tyres supplied for the four-wheel drive hybrid Toyotas and two-wheel drive non-hybrid LM P1s at Le Mans are the same as 2018.

SLICK TYRES

Soft: for non-abrasive track surfaces, low temperatures (less than 15°C) or at night
Medium: for average-wearing or 'rubbered' track surfaces, temperatures in excess of 15°C
Hard: abrasive track surfaces, demanding track configurations, temperatures in excess of 30°C

INTERMEDIATE SLICK TYRES

'Hybrid' intermediate: a pattern-less tread for use in damp conditions, or when conditions differ from one part of the track to another, a scenario frequently encountered at Le Mans. The revolutionary Hybrid intermediate was first raced at Spa in 2012 and first used at Le Mans in 2013

RAIN TYRES

Wet and Full Wet: can have extra grooves cut into their tread pattern depending on how much water there is to clear. Cover a broad spectrum of conditions

LE MANS 24 HOURS TYRE SIZES

LM P2

LE MANS PROTOTYPE 2

LM P2 TYRES

Development work for Le Mans 2018 focused on upgrading performance with no detriment to longevity. Michelin now has a year's experience with these tyres under its belt and the teams have been able to optimise the set-ups of their respective cars as a function of the different options. Although LM P2 tyres and the materials they employ are not 'confidential', they are designed specifically for the class's prototypes (front: 30/68-18 / rear: 31/71-18 rear).

SLICK TYRES

Soft: non-abrasive track surfaces

Medium: averagely-abrasive tracks, temperatures between 15 and 35°C

Hard: for abrasive track surfaces and/or temperatures in excess of 30°C

INTERMEDIATES TYRES

Damp conditions: 're-cut' slicks

RAIN TYRES

A broad operating window for conditions ranging from a damp track to heavy rain

FIA WEC TYRE REGULATIONS

SLICK TYRES

Non-hybrid LM P1 and LM P2 cars: 3 types of slick for the season for all the cars / 2 types of slick to be nominated 48 hours before the Prologue test / 2 types of slick for each race (from the above 3) to be nominated 48 hours before the start of scrutineering (3 types of slick for Le Mans).

LM GTE Pro and LM GTE Am:

3 types of slick per model for the season / 2 types of slick to be nominated 48 hours before the Prologue test / 1 additional type of slick can be registered in the course of the season / 2 types of slick for each race (from the above 3) to be nominated 48 hours before the start of scrutineering (3 types of slick for Le Mans).

RAIN AND INTERMEDIATE TYRES

Can only be used if Race Control declares the track to be wet (free practice, qualifying, race). No quotas per race.

LM P2: 1 type of intermediate tyre and 1 type of rain tyre for the season for all cars entered 48 hours before the Prologue. The re-cutting of tread patterns is not authorised.

LM GTE Am: 1 type of intermediate tyre and 1 type of rain tyre per model entered 48 hours before the Prologue. The re-cutting of tread patterns is not authorised.

In the course of the season, a competitor may change tyre brand no more than once.

Penalty: a 3-minute Stop&Go penalty for tyre regulation breaches

A maximum of 4 mechanics and 2 tyre guns for wheel changes during pit stops. Tyre changes may now be carried out while the car is being refuelled.

1 tyre technician is authorised to carry out a visual inspection of the tyres and check their pressures.

Tyre changes are only authorised a) on the grid up to the three-minute board, b) in front of the car's garage during a pit stop or inside the garage in the case of longer work on the car, c) on the track if the race is suspended.

Tyres are identified by RFID chips and bar codes. All tyre serial numbers must be communicated to the Technical Delegates 48 hours in advance.

MICHELIN AND THE LE MANS 24 HOURS

MICHELIN'S COMMITMENT

Since the inaugural edition in 1923, the Le Mans 24 Hours has stood out as a unique challenge for drivers, cars and tyres alike. In modern times, it has become an unforgiving, exceptionally complex 24-hour sprint that places the emphasis on lasting performance. Every year, Michelin and its partners prepare meticulously for this classic competition.

The Le Mans 24 Hours is a major event for Michelin, for whom endurance racing is the highlight of its motorsport programme and a chance to showcase the longevity and performance of its tyres.

Having won the race's very first edition in 1923, Michelin is this year targeting its 28th victory.

To stand a chance of winning at Le Mans, tyres need to deliver a blend of high performance (to be able to cope with top speeds in excess of 330kph) and durability (to be able to cover distances in excess of 700km at average speeds of around 220kph), as well as consistency and safety.

The Le Mans 24 Hours permits open competition between tyre companies, while the competing prototypes and GTs improve year on year.

To defend its number one status and unbeaten record since 1998, Michelin has had to keep pace with these evolutions to the cars' technology,

adapt to changes to the regulations and, as a result, renew its range season after season with a view to pushing out the envelope on the safety, longevity, consistency and performance fronts at the same time.

For Michelin, Le Mans doesn't last just 24 hours; it lasts 365 days. As soon as the cars cross the finish line, Michelin Motorsport's engineers start to analyse the tyres and data they collect, and begin thinking about improvements they can make for the following year. Prototype tyres are tested during the autumn, signed off at the start of the year and assigned to the teams at the opening races of each endurance racing season.

This extremely complex and intense race constantly forces Michelin to develop and test new technologies in order to enhance the performance durability, versatility, consistency and grip of its tyres. Thanks to the close working relationship Michelin Motorsport's development teams enjoy with the engineers who work out of the company's Technology Centre, the technological solutions developed for the race feed directly into Michelin road tyres to deliver even higher, more consistent performance.

1,231

The distance record (km) for the same set of Michelin rain tyres on a GT1 car (87 laps, in 2008)

6,500

The number of times every tyre flexes during a lap of Le Mans, equivalent to 84,500 flexes during a stint of 13 laps

LANDMARK DATES

1923: MICHELIN WINS INAUGURAL LE MANS

Michelin won the very first edition of the Le Mans 24 Hours with André Lagache and René Leonard driving a Chenard & Walcker, who completed the race at an average speed of more than 90kph round the original 17km circuit.

1965: MICHELIN RETURNS TO LE MANS

Michelin returns to La Sarthe nearly 40 years after its first success. Michelin supplied an Alpine-Renault and a DB/CD.

1967: NEW SLICK TYRES

Michelin innovated with the first radial construction slick tyres at the Le Mans 24 Hours, fitted to an Alpine-Renault A210.

1978: AN ALL-FRENCH VICTORY

Victory for Didier Pironi and Jean-Pierre Jaussaud in a Renault-Alpine A442B on Michelin tyres.

1989: A MICHELIN ONE-TWO

Michelin takes a one-two finish with the Sauber-Mercedes of Mass/Reuter/Dickens and Baldi/Acheson/Brancatelli.

1993: MICHELIN LOCKS OUT THE PODIUM

Peugeot and Michelin lock out the podium with the 905 (winners: Brabham/Bouchut/Hélary).

1999: A MICHELIN TOP FOUR

Michelin completely dominates the race with a one-two-three-four finish in association with BMW, Toyota and two Audis. It also secures success in the GTS class with Chrysler.

2000: FIRST WIN FOR AUDI-MICHELIN

Michelin and its partner Audi score a one-two-three finish at La Sarthe, with the win going to Kristensen/Biela/Pirro.

2003: BENTLEY-MICHELIN, 79 YEARS LATER

Two years after returning to endurance racing, Bentley scores a one-two finish and its fifth overall win, 79 years after the last. Michelin wins in every class.

2006: THE FIRST DIESEL WIN AT LE MANS

Audi achieves success with diesel technology at the Le Mans 24 Hours. Michelin developed specific tyres capable of dealing with the strong forces generated by the Audi R10 TDI prototypes.

2007: TEN IN A ROW FOR MICHELIN

Michelin takes victory for the tenth consecutive time at the Le Mans 24 Hours. It's the French manufacturer's 16th win at the legendary race.

2009: PEUGEOT-MICHELIN: 16 YEARS LATER

Peugeot and Michelin secure a one-two finish at Le Mans, 16 years after their last success together in 1993. Michelin once again wins all four classes and locks out the top 15 positions in the overall standings.

2010: ONE-TWO-THREE FOR AUDI-MICHELIN

The three works Audi R15 TDIs monopolise the podium of the 2010 edition, taking the ninth Le Mans victory for the Audi-Michelin partnership. The N°9 Audi sets a new distance record after covering 5,410.71km on just 11 sets of tyres!

2011: 20TH MICHELIN VICTORY AT LE MANS

Michelin celebrates its 20th victory (and its 14th in a row!) at Le Mans, sharing a tenth victory with its partner Audi. The winning N°9 Audi completed five consecutive stints on the same Michelin tyres, and only used nine sets of tyres in total.

2012: FIRST LE MANS SUCCESS FOR HYBRID POWER

Michelin secures its 15th straight win at Le Mans with the Audi R18 e-tron quattro. The Michelin-equipped car goes down in history as the first hybrid prototype (diesel/electricity) to win the French race. There is victory for Michelin in the LM GTE Pro class, too, with Ferrari.

2013: THE 12TH VICTORY FOR A MICHELIN-EQUIPPED AUDI AT LE MANS

Audi and Michelin celebrate their 12th Le Mans success together. Sadly, however, the 90th anniversary edition is marked by the death of Danish driver Allan Simonsen. The N°2 Audi of Tom Kristensen, Allan McNish and Loïc Duval takes the win ahead of the N°3 Toyota and the N°3 Audi. Porsche and Michelin secure a one-two triumph in the LM GTE Pro class.

2014: AUDI-MICHELIN UNBEATEN AT LE MANS SINCE 2010...

Although Toyota led for more than half the distance, and even though Porsche topped the leaderboard to mark its return to Le Mans in the prototype class, the French race was won yet again won by Audi (R18 e-tron quattro/Michelin). Fässler/Tréluyer/Lotterer claimed their third victory.

2015: PORSCHE-MICHELIN BACK ON TOP AT LE MANS

Seventeen years after their last victory together at the Circuit de la Sarthe, Porsche and Michelin won the 2015 race with the 'third' Hybrid 919 in the hands of Le Mans novices Nico Hülkenberg, Earl Bamber and Nick Tandy. As in 1998, Porsche-Michelin secured the top two places since the Bernhard/Hartley/Webber car was second at the flag. It was Michelin's 24th victory at the great French race.

2016: A MEMORABLE START AND FINISH!

For the first time, the Le Mans 24 Hours started behind a Safety Car following a heavy shower moments before the start. While leading, the N°5 Toyota suffered a cruel mechanical problem during the race's penultimate lap which handed victory to the N°2 Porsche 919 Hybrid/Michelin of Marc Lieb, Neel Jani and Romain Dumas. Ford celebrated its return to Le Mans with a one-two-three finish in the LM GTE Pro class on Michelin tyres.

2017: PORSCHE/MICHELIN WINS BUT TWO LM P2 CARS FINISH ON THE PODIUM

Once again, Toyota came close to winning the Le Mans 24 Hours but glory escaped it one more time. Victory ended up in Porsche's hands for the third year running, while second and third places went to LM P2 prototypes!

2018: TOYOTA/MICHELIN'S FIRST LE MANS SUCCESS

Toyota celebrated its 20th attempt at the Le Mans 24 Hours with a one-two finish led by the TS050 Hybrid/Michelin of Buemi/Nakajima/Alonso. It was the first Le Mans win for F1 star Fernando Alonso. Although it wasn't involved in the fight for outright victory, Porsche/Michelin won both the LM GTE Pro and LM GTE Am classes
