"THE ASPHALT IS STILL VERY ABRASIVE IN PLACES"

ARNAUD RÉMY,
WRC Programme Manager,
Michelin Motorsport

"The Tour de Corse is the first real asphalt round of the season and the 2019 event promises to be particularly interesting because it really does tour the island, with the start in Porto-Vecchio, an overnight in Bastia and the finish in Calvi. Corsica's roads are smoother than before, but the surface is still very abrasive in places and tyre life stands to play a big role again, especially on the Castagniccia stage which is the longest of the week [47.18km]. There's a great entry, too, with 96 crews. So it's going to be a big logistical challenge for our fitters."

FLASHBACK

1999

IT WAS TWENTY YEARS AGO
THAT THE LATE PHILIPPE
BUGALSKI STEERED HIS
CITROËN XSARA KIT-CAR/
MICHELIN TO VICTORY AHEAD
OF ALL THE WORLD RALLY
CAR CONTENDERS. NO OTHER
TWO-WHEEL DRIVE CAR HAS
WON A WRC ROUND SINCE.

After his recent victory in Spain, Bugalski was favourite to win the 43rd Tour de Corse and he effectively won nine stages to beat Citroën team-mate Jesus Puras.

Between them, the two Michelin-equipped Citroën Xsara Kit-Cars were fastest on 13 of the event's 16 stages en route to an emphatic one-two finish in Ajaccio. It was the last victory to date of a two-wheel drive car in the World Rally Championship.

DO YOU SPEAK RALLY?

Special stage (SS)

Special stages (or just 'stages') take place on roads or tracks which are closed to traffic and made secure for competitors and spectators. The length of these timed tests – which can take place in daylight or at night – tend to vary from five to up to 80 kilometres.

Super-special

This is a short stage generally organised in a town centre, especially for spectators. The intention is to take the sport to a wider audience and to organise promotional events at the same time. The times recorded count towards the official results.

Power Stage

On every round of the WRC, the last stage of every rally is known as the Power Stage. The drivers who post the five fastest times on this test are awarded five, four, three, two and one bonus points respectively. The stages are timed to the closest 1,000th of a second.

Road section

Road sections are the itinerary that crews must follow to get to the different stages. These roads are open to other users and competitors must comply with local traffic legislation at all times. Road sections must be covered in a time specified by the organisers. Penalties are incurred for late or early arrival at the next time control. The penalty for late arrival is 10 seconds per minute and the penalty for early arrival is one minute per minute.

Service park

The service park (or service area) is a place where work is permitted on the cars, including tyre changes. The time spent in a service park can vary from 15 to 45 minutes.

Regroup

'Regroups' are holding zones which enable the organisers to include a pause in the timetable, before a service halt, for example, or between two loops of stages. Work on the cars is not permitted.

Parc ferme

This is the zone where competing cars park up before the start of a rally and at the end of each leg. Work on the cars is not permitted.

Time controls (TC)

Crews must have their timecard stamped by marshals before and after each stage, as well as into and out of service areas and regroupings. These mandatory passage controls ensure that competitors comply with the official timetable.

Shakedown

A shakedown test is organised ahead of all WRC events using a short section of a sample road. This test usually takes place on the Thursday morning before the start. Each priority driver must complete at least three passes. Should the car suffer damage or break down during this test, crews can still take part in the event if repairs are completed in time.

Road book

An official road book is given to all competitors before the start of 'recce'. It provides a detailed description of the itinerary in the form of detailed illustrations of junctions, etc. A competitor who doesn't follow the road book may be disqualified.

Recce

Recce involves driving over the special stages at slow speed at the wheel of road cars ahead of the rally, the aim being to take turn-by-turn pace notes. Only two passes through each stage are authorised.

Course cars ('triple zero', 'double zero' and 'zero')

Course cars are safety cars which cover the stages before the competitors. Their mission is to warn spectators of the imminent arrival of the cars. Course cars bear the numbers '000', '00' and '0' on their doors. They pass between 30 and five minutes before the due time of the first competitor.
