In the case that Q1 and Q2 sessions are both declared wet by the Race Director, the extra tyres allocated will be rain tyres.

### MISANO IS AN UNUSUAL

### CIRCUIT AND YOU NEVER REALLY KNOW WHAT TO EXPECT.

Back-to-back races are always a demanding time, but at these two events ahead of us we also have the added pressure of three MotoE races over the two weekends as well as the two MotoGP races. It will be a very busy time, but everybody involved will be totally focused on their different roles to make sure all the riders - no matter what class - get exactly the same kind of information and assistance. Misano is an unusual circuit and you never really know what to expect. It gave lots of grip in 2018 and we broke records and saw fast and consistent laps, but then last year the asphalt behaved as if there was hardly any traction at all, so it was good to have it resurfaced in readiness for this season and because of testing we conducted with various teams and riders, we have the data to choose this year's compounds, we now have to see how the asphalt performs during a race weekend.

MotoE will have three races, one during the first weekend and then two the following week. We will be using the new tyres

with the biomaterials and regenerated materials, these performed really well at Jerez in July and we expect them to give the riders the grip they need for this form of sustainable racing, which is very important to Michelin. There will also be a big change during these two weekends because we will have spectators for the first time after five races without any. It will be a smaller amount than is normally at Misano, but this is an important step forward, especially when you consider how much Italy suffered at the start of this pandemic, it is a very positive step to see the relevant authorities taking this decision and allowing some fans in, I hope we all give them a show to be proud of.

Based upon the track layout and expected conditions for each Grand Prix, Michelin will select the most suitable tyre compound option for each race weekend.

## NEW

### Faster

The pre-season test at Jerez saw riders lap the Spanish circuit a second-and-a-half quicker on average compared with 2019 thanks to:

- ✓ The higher torque delivered by the Energica Ego Corsa.
- ✓ Michelin's latest tyres which notably feature a new rear compound developed thanks to experience acquired in MotoGP™.
- ✓ Front suspension set-up improvements.

### Longer distances

Thanks to ongoing innovation work, the FIM MotoE™ World Cup:

- ✓ Uses new Enel X battery chargers.
- ✓ Allows an additional race lap now that the bikes can be charged on the grid.
- ✓ Run a new battery-cooling system which enables the riders to complete longer sessions.
