### DANILO PETRUCCI, DUCATI

Winner of the race

The race was very difficult because in the beginning we had a lot of water, fortunately the Michelin guys said to me that the best choice was to put the medium front in the bike, the tire gave me a lot of confidence. I was really pleased with the feeling I had from the tire and despite the cold temperatures they worked perfectly and I am very happy.

### THE WEATHER COULD GIVE THE RIDERS THE OPPORTUNITY TO MAKE USE OF THE HIGH GRIP LEVELS PROVIDED BY OUR 2021 RAIN TIRES

We are all very much looking forward to our home race, and the different challenges it will offer us and the riders. So far this

season we have been to circuits with warm and dry conditions, but

in Le Mans the weather could be changeable at this time of year, and this could give the riders the opportunity to make use of the high grip levels provided by our 2021 rain tires.

# WORLD CUP

2020 FIM ENEL MotoE™

## PIERO TARMASSO

Michelin Motorsport, Two-Wheel Manager

It will also be good for the MotoE riders to have their second race weekend of the season, following the first at Jerez, and to give them another opportunity to showcase our more environmentally-friendly range of tires, that we have developed specifically for the electric Energica machines using a wide range of sustainable materials, from scrap car and truck tires to orange and lemon peel.

### NEW TIRES FOR 2021:

#### Sustainable materials account for between 33 and 40 percent

of the content of Michelin's new MotoE™ tires

In terms of its FIM MotoE™ World Cup programme, the proportion of sustainable materials used to make its rear tires for the 2021 series has already reached 40 percent, while the figure for its front MotoE™ tires stands at 33 percent.

A wide variety of bio-sourced and recycled materials are employed for the production of Michelin's MotoE™ tires, including: orange and lemon peel, pine resin, sunflower oil, hevea sap, worn truck and car tires, scrap steel.

The increase in the proportion of bio-sourced and recycled materials that go into Michelin's MotoE™ tires means that 4.6 tonnes of sustainable materials will be used in the course of the 2021 series.

### A SINGLE FRONT REAR PAIRING

- ✓ **Exceptional versatility:** just one combination of front and rear tires to cover all the circuits visited by the 2021 series.
- ✓ **High performance:** a revised materials-specification, yet superior performance compared with 2020
- ✓ **Grip:** grip performance from Turn 1, Lap 1
