**THE DATA
 CONVINCED
 US TO SELECT
 HARDER RUBBER
 COMPOUNDS
 FOR THE FRONT**

We had been thinking about making these changes since last year, and the data recorded since the start of the 2024 season convinced us to take the plunge and select harder rubber compounds for the front. The tires we brought here last season were perfectly adapted, and we broke all the records. However, given the level of performance of the 2024 bikes and the number of times that they have recently been improved, we realise that our partners now have slightly different tire needs, especially at the front. That's why we made this decision, in order to offer riders even more consistent performance, as well as better feel. Misano is a fairly flat, rather technical track, which is demanding on the tires because it alternates between slow and fast corners. Some sectors, such as the hairpin at Tramonto, or Curvone which is a long very high speed right-hander, generate significant stress on the tires. We know that the combination of harder rubber compounds at the front, along with a rear tire compound that perfectly transmits the power to the track, will create the optimum tire cocktail to perform well.

WORLD CHAMPIONSHIP

2023 FIM ENEL MotoE™

Michelin has been the FIM MotoE™ World Championship's sole tyre supplier since the all-electric competition was first organised in 2019. The Group sees this highly competitive series as a full-scale research and development laboratory where it can explore and test technological innovations in exacting conditions. Not only have the unique opportunities for innovation that MotoE™ offers seen Michelin increase the proportion of renewable and recycled raw materials that its tyres for the championship contain, but they are also speeding up the emergence of specific solutions for tomorrow's electric motorcycles and scooters.

Michelin sees MotoE™ as a means to accelerate innovation as it prepares for tomorrow's world of two-wheel mobility, with powerful analysis and smart data at the heart of its development processes.

A NEW DESIGN FOR THE REAR TIRE

This unique design features a head-turning look. Inspired by Michelin's VISION Concept, its ephemeral, velvet-effect Race to Vision motif vanishes once racing begins. VISION is the fruit of the sustainable development model conceived to contribute to Michelin's plan for 2050 and beyond.

RENEWABLE AND RECYCLED RAW MATERIALS

The MICHELIN MotoE range of tires contains 49 and 53 percent renewable and recycled materials front and rear respectively, compared with 34 and 52 percent in 2023.

ALLOCATION

A single front rear pairing

- ✓ **Perfect versatility:** the tires adapt to all the season's circuits
- ✓ **Performance:** increase the performance of 2023 while increasing the percentage of recycled and renewable materials
- ✓ **Grip:** offering grip from the very first corners

ALLOCATION PER RIDER

8 MICHELIN Power slicks MotoE of the same specification

4 new front tires and 4 new rear tires
+ 1 a bedded-in set from the previous race

7 MICHELIN Power Rain MotoE of the same specification

3 front tires and 4 rear tires

- Riders who participate in both Q1 and Q2 qualifying sessions (maximum 2 riders) will be allocated one extra rear slick tire after Q2 (therefore, if taken, a maximum of 5 rear new slick tires).
- In the case that Q1 and Q2 sessions are both declared wet by the Race Director, the extra tires allocated will be rain tires.
- In the case that Q1 and Q2 sessions are declared as different weather conditions then no extra tire will be allocated.
