**WE HAVE DECIDED
TO CONTINUE
WITH THE SAME
THREE FRONT TIRE
COMPOUNDS**

It's possible that we'll have temperatures twice as low here as we did at Mugello a few days ago, but also rain!' And as the circuit has fast corners where grip is standard, our partners need tires that offer good thermal behaviour but also stability. Last year, we relied on data from previous years (up to 2020, when the asphalt was last resurfaced) to make the Hard compound a little harder for the front tire. Based on our findings in 2024, we have decided to continue with the same three front tire compounds and the same rear tire compounds and structures. This package is very consistent, and we know that it will deliver precise handling in quick succession corners – and therefore in weight transfers – as well as consistent performance across the board.

WORLD CHAMPIONSHIP

2025 FIM MotoE™

Michelin has been the sole tire supplier for the MotoE™ World Championship since its inception in 2019. It offers a unique environment for innovation, helping the Group speed up the integration of renewable or recycled materials in its tires and expand its knowledge of electric mobility — ultimately supporting faster development of its commercial product lines.

This year, Michelin's development teams achieved a historic milestone with **MotoE™ tires incorporating an average of 57% renewable or recycled materials** (58% front, 56% rear).

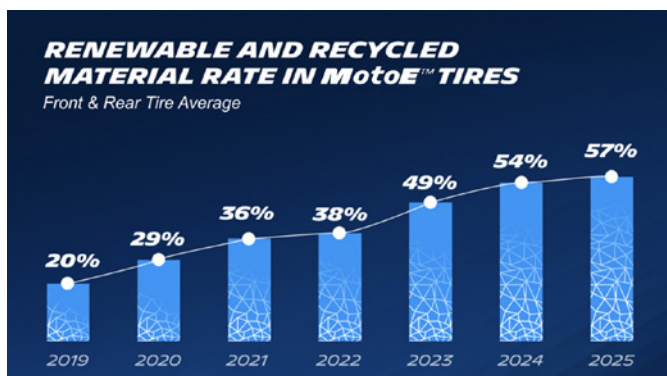

The MotoE™ tires feature a broad spectrum of **renewable and recycled materials**, including natural rubber from hevea tree sap, recycled carbon black from end-of-life tires (via pyrolysis by partner company Enviro), limonene resin from orange and lemon peels, rayon from wood cellulose, sunflower oil, recycled steel from scrap metal (via electric arc furnace by partner Global Steel Wire).

In 2025, Michelin integrates 57% renewable and recycled materials into its MotoE™ tires — while improving performance without increasing environment impact

MotoE™ Tires with a New Look Reflecting the Group's Ambition: The All-Sustainable Tire

After the rear tire in 2024, both the front and rear tires now feature the special livery, which has been slightly revised this year to extend over the sidewalls. This unique design, called Race to Vision, is directly inspired by the VISION Concept — a symbol of Michelin's sustainable tire development model looking ahead to 2050.

This design is reserved for tires that exceed 50% renewable and recycled content.

ALLOCATION

A single front rear pairing

- ✓ **Perfect versatility:** the tires adapt to all the season's circuits
- ✓ **Performance:** increase the performance of 2024 while increasing the percentage of recycled and renewable materials
- ✓ **Grip:** offering grip from the very first corners

ALLOCATION PER RIDER

10 MICHELIN Power slicks MotoE™ of the same specification
5 new front tires and 5 new rear tires

7 MICHELIN Power Rain MotoE™ of the same specification
3 front tires and 4 rear tires

- Riders who participate in both Q1 and Q2 qualifying sessions (maximum 2 riders) will be allocated one extra rear slick tire after Q2 (therefore, if taken, a maximum of 6 rear new slick tires).
- In the case that Q1 and Q2 sessions are both declared wet by the Race Director, the extra tires allocated will be rain tires.
- In the case that Q1 and Q2 sessions are declared as different weather conditions then no extra tire will be allocated.
